Recom Retains Battelle to Complete Production Engineering, Manufacture Pre Production Devices and Test Its Ambulatory Heart Monitoring Systems

STUDIO CITY, Calif., May 27 /PRNewswire-FirstCall/ -- Recom Managed Systems, Inc. (OTC Bulletin Board: RECM - News), a leader in innovative design and development of ambulatory medical devices containing the company's proprietary signal processing technology, announced today that it contracted with Battelle Memorial Institute, Health and Life Sciences to complete pre-production manufacturing and engineering, as well as compliance testing, to support the production and marketing of Recom's Heart Monitoring System.

As part of their agreement, Battelle will conduct compliance evaluations of Recom's first device to the standards relating to ambulatory electrocardiographs (EC38), to performance standards for cardiac monitors (EC13) and to diagnostic electrocardiograph devices (EC11). Engineering to meet these additional standards will allow Recom's device to be used for a wide array of ambulatory monitoring with diagnostic and clinical capabilities.

"We are excited about the potential for our ambulatory heart monitoring system and this agreement with Battelle is yet another step toward revolutionizing cardiac monitoring. The quality of our signal and design of our product will for the first time, provide ambulatory, diagnostic and clinical data to the medical community via a single device," commented Marvin Fink, Recom's Chairman and CEO. "Recom's heart monitor is the only true 12-lead, 10 electrode ECG monitor for use in an ambulatory setting which provides clinical quality data to physicians in real time."

About Recom Managed Systems

Recom Managed Systems, Inc. is an emerging life sciences company focused on the monitoring and detection of disease through continuous biomedical signal monitoring. Recom Managed Systems, Inc. uses its patented signal technology to design and develop FDA-approved medical devices that simplify and reduce the costs of diagnostic testing and patient monitoring in an ambulatory setting. With our patented signal technology platform, Recom brings clinical quality physiological signal monitoring to the ambulatory setting.

About Battelle

Battelle is a global leader in science and technology. We provide technology solutions to both government and commercial clients through the development of new products and technologies and the management of national laboratories and large-scale technology resources. Battelle develops practical technology solutions and offers comprehensive product development capabilities for applications in national security, energy, and the environment, transportation, and space, and health and life sciences. Battelle is a recognized leader in providing contract research and development services to the healthcare industry. Founded in 1925 and headquartered in Columbus, Ohio, Battelle (and the national laboratories that it manages) employs over 16,000 people, generating over \$2.7 billion in research and development annually.

Statements in this release that are not strictly historical are "forward-looking" statements. Forward-looking statements involve known and unknown risks, which may cause Recom's actual results in the future to differ materially from expected results. Factors which could cause or contribute to such differences include, but are not limited to failure to complete the development and introduction of new products or services, failure to obtain federal or state regulatory approvals governing medical devices, monitoring and other related services or products, inability to obtain physician, patient or insurance acceptance of Recom's products or services, adverse equity market conditions and declines in the value of Recom's common stock, and the unavailability of financing to complete management's plans and objectives. These risks are qualified in their entirety by cautionary language and risk factors set forth and to be further described in Recom's filings with the Securities and Exchange Commission.
