Recom Managed Systems Will Attend the 2005 Heart Rhythm Society Meeting

LOS ANGELES--(BUSINESS WIRE)--March 18, 2005--Recom Managed Systems, Inc. (OTCBB:RECM - News) announced today that will be exhibiting its innovative ambulatory 12-lead ECG platform technology at the 2005 Heart Rhythm Society meeting in New Orleans on May 4th through 7th. The Company will be presenting its patented signal processing platform that allows for the production and recording of a clinical quality ECG while the patient is ambulatory.

"I am looking forward to presenting our patented technology and product at the Heart Rhythm 2005 meeting," said Marvin H. Fink, Recom's CEO. "From the feedback we received at the recent American College of Cardiology (ACC) ACC meeting, it is clear that demand for our product exists. By attending tradeshows such as the ACC meeting and the Heart Rhythm 2005 meeting, we hope to begin educating the cardiology community as to the benefits of our technology. We anticipate that this pre-marketing, as well as the favorable results of certain trials currently underway, will create a significant demand in the marketplace.

James Mazeika, Recom's Director of Marketing, added, "Displaying our technology at the ACC was the first step in letting the medical community see our device and technology. Exhibiting our innovative system at the Heart Rhythm Society will allow our target audience to view this novel technology first hand, which provides data similar to resting ECGs, but in an ambulatory setting. I expect the same positive enthusiasm from this meeting as I did at the ACC, if not more."

About Recom Managed Systems, Inc.

Recom Managed Systems, Inc. is an emerging life sciences company focused on the monitoring and detection of disease through continuous biomedical signal monitoring. Recom Managed Systems, Inc. uses its patented signal technology to design and develop medical devices that simplify and reduce the costs of diagnostic testing and patient monitoring in an ambulatory setting. With our patented signal technology platform, Recom brings clinical-quality signal monitoring to the ambulatory setting.

Caution Regarding Forward-Looking Statements

Statements in this release that are not strictly historical are "forward-looking" statements. Forward-looking statements involve known and unknown risks, which may cause Recom's actual results in the future to differ materially from expected results. Factors which could cause or contribute to such differences include, but are not limited to, failure to complete the development and introduction of new products or services, failure to obtain federal or state regulatory approvals governing medical devices, monitoring and other related services or products, inability to obtain physician, patient or insurance acceptance of Recom's product or services, adverse equity market conditions and declines in the value of Recom's common stock, and the unavailability of financing to complete management's plans and objectives. These risks are qualified in their entirety by cautionary language and risk factors set forth and to be further described in Recom's filings with the Securities and Exchange Commission.
