Recom Managed Systems Completes Prototype of Noise-Reduction Device for Intracardiac ECG Recordings

GREENVILLE, S.C.--(BUSINESS WIRE)--Sept. 22, 2005--Recom Managed Systems (AMEX:RSY - News) announced that it has completed development of a prototype device to be utilized for noise-reduction purposes during intracardiac electrogram recordings.

The initial test of the device, which was successful, recently occurred at the Electrophysiology Laboratories at Cleveland Clinic Heart Center. Andrea Natale, M.D., Co-Section Head of Pacing and Electrophysiology at The Cleveland Clinic Department of Cardiovascular Medicine, commented: "I am excited to work together with Dr. Drakulic on this important project."

Dr. Budimir S. Drakulic, the inventor of the company's technologies and its Chief Technology Officer, stated: "We are very excited to see different clinical applications being developed from our patented signal-amplification technology. From the Company's inception, our vision was to expand applications of our technology from ECG signal recordings in ambulatory settings into environments of electrophysiology and catheterization laboratories. I very much look forward to the upcoming clinical studies that will be conducted at The Cleveland Clinic, a prestigious medical institution that has long been viewed as the foremost heart center in America. Dr. Andrea Natale, who has pioneered some of the present catheter-based cures for atrial fibrillation, has been a very important member of our Medical Advisory board, and I am enthusiastic about our future work together. With our new management team, the commercialization of our technologies will undoubtedly be put to the highest and best possible use for patients."

About Recom Managed Systems, Inc.

Recom Managed Systems, Inc. is an emerging life-sciences company focused on the monitoring and detection of disease through continuous biomedical signal monitoring. Recom Managed Systems, Inc. uses its patented signal technology to design and develop medical devices that simplify and reduce the costs of diagnostic testing and patient monitoring in an ambulatory setting. With its patented signal-technology platform, Recom brings clinical-quality physiological signal monitoring to the ambulatory setting.

Recom's first product, the Model 100 Heart Monitor, is an ambulatory patient heart monitor that uses patented signal-processing technology to record a clinical-quality ECG signal in the presence of interference generated by the patient's body movements and ambient environment. The Model 100 has received 510(k) clearance from the Food and Drug Administration.

Recom Managed Systems, Inc. is traded on the American Stock Exchange under the symbol RSY. More information is located at <http://www.recom-systems.com>
